

### **F. & R. Combination Special Vise**

**Fulton Machine & Vise Co., Lowville, N. Y.**

This vise has been designed to handle a large variety of work in the service station or garage. Its combination of jaws and shear and their adaptability to many adjustments is its big feature. It has two sets of jaws, for round and square objects. Either set of jaws can be used on top or at any angle and locked. It is highly finished with gloss French gray enamel.
